PROFESSIONAL SUMMARY

Consumer Insights Analyst with 3+ years turning survey, FMCG, and tracking-study data into decision-ready insights for 20+ international clients. Strong on methodology — survey design, wave-over-wave validation, and significance testing — so findings stand up to scrutiny as well as land in the room. Pairs SQL, Python, Power BI, and Tableau with a design background that makes complex results legible to executives.

CORE SKILLS & TOOLS

Consumer Insights: Survey & Tracking Studies, FMCG Research, Segmentation, Panel & Quota Management, Significance Testing, Survey Methodology, Stakeholder Reporting

Data Analysis: SQL (BigQuery, PostgreSQL), Python (Pandas, Matplotlib), Advanced Excel, Statistical Validation, Descriptive Statistics

Visualization & Reporting: Power BI (DAX), Tableau, Data Storytelling, Dashboard Design, Executive Decks, PowerPoint, Keynote

Ways of Working: AI-assisted Python/SQL development (Cursor, Copilot), JIRA, Confluence, Agile, Slack, MS Teams

Languages: Greek (Native), English (Fluent)

Certifications: SQL Bootcamp: Zero to Hero (Udemy) • Manual Software Testing / QA (Udemy)

PROFESSIONAL EXPERIENCE

Consumer Insights Analyst — Braincandy

Apr 2023 – Present

Full-time, Remote • FMCG & consumer tracking research

- Built standardized chart libraries and reporting templates that cut deck-production time by ~50% and made reporting consistent across the team — freeing analyst hours for actual analysis.
- Owned the end-to-end data lifecycle for international tracking studies — up to 1,200 respondents per wave, from validation through executive reporting — for 20+ major FMCG clients, with 100% on-time delivery.
- Ran wave-over-wave statistical validation and significance testing so every reported movement was real and defensible, giving stakeholders confidence to act on the findings rather than re-litigate them.
- Directed survey operations and panel/quota management across 4 international markets, maintaining strict data-integrity protocols under tight wave deadlines, and mentored junior analysts on analysis and visualization best practice.
- Introduced AI-assisted tooling (Cursor, Copilot) into the analysis and reporting workflow, accelerating Python/SQL scripting and template production without compromising accuracy.

Earlier Analytical Experience

Research Analyst — Hellenic Foundation for Research & Innovation (ELIDEK) Contract, 2021–22

- Analyzed datasets in Python (Pandas) for funded academic research, applying sampling and validation rigor directly transferable to commercial survey work, and translated technical metrics into accessible charts for non-technical partners and scientific committees.

Data Analyst — Callisto NGO (Volunteer, 2021): Cleaned and structured thousands of raw observation records to high data fidelity and built visual reports that helped leadership prioritize limited resources.

PRIOR CAREER — GRAPHIC DESIGN

Graphic Designer (2014–2020) — Exalco S.A., Biokarpet, The Smalls, and freelance. Six years in visual communication before moving into data — the foundation behind the reporting craft that sets my analysis apart: clear hierarchy, legible charts, decks read at a glance.

EDUCATION

MSc, Management in Conservation & Biological Resources

Aristotle University of Thessaloniki • 2022

BA & Integrated MSc, Economics of Agriculture

Aristotle University of Thessaloniki • 2013

BA, Graphic Design

1st IEK Larissa • 2015
